**Memphis International
Airport Opens New
Concourse**

Memphis has consolidated and opened its new, elaborate and functional Concourse B known to staff as "The Concourse".

Memphis International Airport (MEM) opened its modernized B concourse on Tuesday, February 15. The \$245 million, multi-year project features the modernization of the spine and east leg of MEM's B Concourse as well as consolidation of all airline, retail, and food/beverage businesses.

Gene Conrad Leaving Airport Director Job to Head Aerospace Center/Sun 'n Fun - LkldNow
LkldNow

Sun 'n Fun and the city of Lakeland announced today that Gene Conrad, who has been director of city-owned Lakeland...

The redesign includes the addition of wider corridors, moving walkways, larger boarding areas, higher ceilings and increased natural lighting. The project also includes much-needed seismic upgrades.

“This is an exciting day for MEM, Memphis, and our passengers,” said Michael Keeney, Chairman of the Memphis-Shelby County Airport Authority Board of Commissioners. “We are truly reinventing the Memphis travel experience, and we can’t wait to welcome our passengers.”

Highlights

- Higher ceilings
- Larger gate areas and wider corridors
- Moving walkways
- Increased natural lighting
- New and enhanced restaurant/retail options
- Children’s play area
- Stage for live music in Rotunda area
- Charging stations, cup holders and outlets at every gate seat.
- All-new art program that includes 61 different artworks representing 62 artists, all of which are from or connected to Memphis.

Construction details:

- The stem and southeast leg of the B Concourse have been completely modernized and house all airline, retail and restaurant operations.
- The southwest leg will only be utilized for international arriving flights and will not be redesigned during the first phase of modernization.
- There are 23 gates available to airlines, which can accommodate about 6 million passengers, about 50% more traffic than MEM’s pre-pandemic levels.
- Continued long-term growth at MEM could facilitate another modernization phase for the west leg of the B Concourse, which contains about 15 more gates that could increase capacity to nearly 11 million annual passengers.

Come see it all in person for the 2022 SEC-AAAE Annual Conference and Exposition when the Southeast Chapter returns to its roots at the Peabody Hotel on April 10-12, 2022!

Gulf Shores International Airport Awarded Airport Rescue Grant of \$59,000

Gulf Shores, Alabama (12-10-21) – Congressman Jerry Carl announced today that Gulf Shores International Airport was awarded a grant of \$59,000 through the Airport Rescue Grant Program for Fiscal year 2022. This grant award is provided to reimburse the airport for operating costs incurred during the COVID-19 pandemic.

In a recent statement Congressman Carl remarked “I’m proud to announce today that the Gulf Shores International Airport will be receiving a \$59,000 grant to reimburse them for extra operating costs they took on because of the COVID pandemic. The Gulf Shores International Airport is critically important to the growth and economic strength of Baldwin County, so I will continue doing all I can to be an ally for them in Congress.”

Chairman Vic Roberts of the Gulf Shores Airport Authority expressed his sincere appreciation to Congressman Carl for his assistance and continued support for the airport and surrounding community it serves, during these challenging times.

McFarland Johnson Announces Promotion of John L. Mafera, Jr.

McFarland Johnson (MJ), a 100% employee-owned planning, engineering, and construction administration firm, is pleased to announce the recent promotion of John L. Mafera, Jr., to the position of Vice President.

MJ's President/Chairman Chad Nixon stated that "John has tirelessly lead MJ's aviation services expansion across the Southeast and beyond with his strong understanding of client needs, attention to detail and development and management of a variety of multidisciplinary aviation projects. We congratulate him on this promotion and look forward to a bright future."

Mr. Mafera currently serves as the Southeast Regional Director in MJ's Aviation Division and is a certified, instrument-rated, private pilot with 24 years of unique aviation planning, design, and project and program management experience at commercial service and general aviation airports across the U.S. John's broad technical expertise includes dynamic airport master planning, strategic airport real estate development, airport terminal and facility expansion studies, and program management and implementation. John's experience with various client and project sizes, as well as his pilot background, gives him a unique "big picture" approach that considers the interests of all project stakeholders and delivers projects with exceptional client service. John will continue to lead MJ's growth in the Southeast and on key initiatives throughout the U.S. and Caribbean.

For more information, please contact John at jmafera@mjinc.com or visit www.mjinc.com.

McFarland-Johnson, Inc., is a 100% employee-owned multi-disciplinary firm with office locations across the US. We serve transportation, aviation, civil/facilities, and environmental markets with planning, design, and construction services, as well as value-added offerings such as grant administration and technology applications. We deliver responsive and innovative solutions that address our clients' greatest challenges.

Connico Announces Three Promotions to Support Company's Growth

Mount Juliet, Tenn. - January 19, 2022-- [Connico](#), a leading, national consultancy that services the aviation, civil, transportation, institutional, commercial, and industrial markets, today announced the promotion of three team members to elevated roles in the company. Promotions include Charles Cleary to Chief Cost Specialist, Tere Ayers to Specialist, and Caleb Claxton to Analyst II.

Cleary has 32 years of experience in transportation, industrial, residential and commercial construction cost estimating. He joined the Connico team in 2018 and formerly served as Senior Cost Specialist. In his new role, he will lead all of Connico's estimating processes. He'll oversee project schedules and quality at a high level and will continue to be involved in helping Connico achieve its long-term business goals as a member of the Senior Leadership Team.

Ayers, who previously served as Analyst III, joined Connico in 2019 with over 37 years of experience in estimating, cost engineering and quantity surveying and has excelled at analyzing costs by providing cost observation and direction. Her expertise in architectural estimating has been invaluable over the past year, and her new position as a Specialist reflects a move up to a primary technical role. In her new role, she'll have additional opportunities to manage project teams, work on complex projects and interact directly with clients.

Claxton joined Connico in 2018 as an Analyst I after receiving his degree in civil engineering from the University of Louisville. While his previous experience focused on assisting in the development of cost estimates, value integration, systems analyses and field observation, his new position as an Analyst II provides him more exposure to various project types and more detailed nuances of estimating and scheduling. He'll also be given the opportunity to exercise greater leadership on projects.

"I'm incredibly proud of Connico's continued growth. Much of what we've accomplished is a result of the team's tireless work, dedication, and collaborative culture," said David Hunley, co-owner and vice president. "Charles, Tere and Caleb have been an important part of our success and the culture we've developed at Connico, and I look forward to their continued contributions going forward."

Connico Names New President, Expands Roles of Two Senior Leaders

[Connico](#), a leading, national construction consultancy, today announced that it has named long-time senior team member, Sri Kumar, as majority owner and president.

“This announcement comes at an important time as Connico is positioned for significant growth ahead, and I am confident that Sri is the right person to continue to lead this momentum,” said David Hunley, Connico co-founder. “We are excited to have another strong leader at the company’s helm. Sri embodies our core values and has demonstrated an unparalleled commitment to the success of our team and clients over the past 11 years.”

Kumar joined Connico in 2011. Since then, he has risen through leadership ranks to member of the Senior Leadership Team and most recently served as a Senior Project Specialist. Sri is also known for his industry leadership and currently serves on the board of the Airport Consultants Council (ACC). He’s also the current president of the Kentucky Society of Professional Engineers Northern Kentucky chapter. In 2015, he was selected to participate in the Leadership PE program, a highly competitive leadership development program designed to encourage, strengthen and build the professional careers and the civic involvement of engineers. In 2021, he was named a “40 Under 40” award recipient by *Airport Business Magazine*.

“I’m incredibly honored to further Connico’s great legacy, which has been built over the last 32 years,” said Kumar. “We have a rock-solid team, and I’m humbled to have the opportunity to lead them in helping our partners develop solutions to complex challenges.”

Along with the president change, Connico also announced today that David Hunley will expand his role from Vice President to Chief Development Officer. Bryan Hafertepe has also joined the ownership team. He has stepped into the Chief Operating Officer role and will lead Connico’s recruiting and retention initiatives.

Hunley has been with Connico since 1992 and has 39 years of experience in cost estimating, scheduling, construction oversight and administration, resident project representation, design support, and engineering fee reviews. Hunley will have the title of Chief Development Officer. He will now focus on the development and growth of the business as well as growth and development of staff.

Hafertepe is a licensed professional engineer. He focuses on assisting in developing cost estimates, value integration, project management, and construction observation. He has worked on projects at nearly 55 airports in the last 5 years. In his expanded role as Chief Operating Officer, Hafertepe will also lead the company’s retention and recruitment efforts, including training and mentoring.
